Industrial Visit Report

Name of the Department	
Date of Visit	
Academic Session / Year/ Semester	
Faculty Coordinator(s)	
Head of the Department	
Name of Industry Visited	

Profile of the Industry Visited (Brief Introduction)

- Products/Services
- Core Business Areas
- Major Engineering Activities
- Vision and Mission (if available)
- Organizational Structure

Detail of the Industry Experts (Interacted with)

- Name
- Designation
- Topics Discussed

Example - Industrial automation, Career opportunities, Internship process, Industry expectations

Objectives of the Industry Visited: - Clearly state the objectives of the industrial visit. Typical objectives include:

- To expose students to real industrial environments.
- To understand practical engineering applications.
- To bridge the gap between theoretical concepts and industrial practices.
- To understand manufacturing, design, testing, maintenance, or operational processes.
- To observe industrial automation and digital technologies.
- To understand quality management and safety practices.
- To appreciate industrial professionalism and work culture.

Technical Overview: - Provide a concise description of the major engineering activities carried out in the organization. Include:

- Core technologies
- Engineering processes
- Automation systems
- Digital technologies
- Production philosophy
- Operational workflow

Departments and Facilities Visited: - For each department visited, describe:

- Purpose of the department
- Major activities
- Machinery or equipment observed
- Engineering principles involved
- Key observations

Equipment and Technologies Observed: - Describe the major equipment and technologies observed during the visit. Examples include:

- CNC Machines
- Robotics
- PLC-based Automation
- SCADA Systems
- Industrial IoT
- Artificial Intelligence Applications
- Machine Vision Systems
- CAD/CAM Software
- Testing Equipment
- Quality Inspection Systems

Quality Assurance and Safety Practices: - Discuss the quality and safety practices observed, including:

- Quality inspection procedures
- Process monitoring
- Preventive maintenance
- Personal Protective Equipment (PPE)
- Fire safety systems
- Emergency preparedness
- Occupational health practices
- Hazard identification
- Workplace safety culture

Environmental and Sustainability Practices: - Describe the environmental initiatives observed, such as:

- Waste management
- Water conservation
- Energy efficiency
- Pollution control measures
- Renewable energy utilization
- Green manufacturing practices
- Resource optimization

Key Learning Outcomes: - Summarize the important learning gained through the visit.
The report should reflect:

- Practical understanding of engineering concepts
- Exposure to industrial technologies
- Appreciation of quality systems
- Understanding of professional ethics
- Awareness of industrial safety
- Teamwork and communication skills

- Knowledge of industrial best practices

Subject/Course mapped: -

- Name of the Course -
- Course Code -
- Year/Semester -

Learning Outcome	Program Outcomes (POs)													
	1	2	3	4	5	6	7	8	9	10	11	12	PSO1	PSO1
1														
2														
3														
4														

Gap Fulfilment in Academics - Industrial visits can be used to bridge several academic gaps.

Academic Gap **Example:-** Theory-Practice Gap, Lack of AI Exposure, Sustainability Awareness, Innovation	**Industrial Visit Solution**

Suggestions: - Provide constructive suggestions regarding: Future industrial visits, Industry–academia collaboration, Internship opportunities, Laboratory improvements, Skill development initiatives, Emerging technology exposure

Conclusion: - Summarize the overall experience, highlighting the educational value of the visit, the enhancement of technical knowledge, exposure to industrial practices, and the role of such visits in preparing students for professional engineering careers.

Faculty Coordinator Remarks:

Faculty Coordinator Name & Signature

Annexures: - The following supporting documents may be attached:

- Industrial Visit Approval
- Visit Schedule
- Attendance Record
- Group Photograph (Geo-Tag)
- Student's Feedback
- Any Certificates Issued
